

For an overview and general description of all courses at Delft University of Technology you need to consult the digital studyguide:

<http://www.studyguide.tudelft.nl/>

First, switch the page to English in the upper right hand corner.

All courses at TU Delft have a combination of letters (program) and numbers (course numbers) as well as a full title. For example; MOT1420 and EPA1311. On the site of the digital study guide you can search courses by code (e.g. MOT1420), instructor or text (part of the full title of the course), as can be seen below. If the box "only electives" is already checked, you should uncheck it:

**Search** **Program**

**Course code**

**Instructor**

**Text**

The asterisk (\*) can be used as wildcard character in the search.

Only electives

**Tag** --

[Student affairs \(study abroad, well-being, etc\)](#)

[Regulations \(student's charter, CER, etc\)](#)

[Academic Calendar](#)

Please note that when searching the courses in the study guide, you may need to use the previous academic year if the course does not appear, as not all of next year's courses may already be in the online database.

If you want to view your complete program, select "program" and choose organization.

Faculties:
Aerospace Engineering (AE)
Applied Sciences (AS)
Architecture (Arch)
Civil Engineering & Geosciences (CEG)
Electrical Engineering, Mathematics and Computer Science (EEMCS)
Industrial Design Engineering (IDE)
Technology, Policy and Management (TPM)
Mechanical, Maritime and Materials Engineering (3ME)

Then select your 'education type', like bachelor or master. All Master courses are given in English. At present over 250 of available bachelor courses are taught in English, and this number will continue to increase during the period 2015-2020. TU Delft aims that by 2016 all bachelor minors will be taught in English and by 2020 every bachelor program offers at least 30 ECTS credits of English-taught courses. A list of bachelor courses taught in English can be downloaded [here](#).

After you have selected your faculty and education type, then select the right program under 'education'. Each Faculty offers several programs.

Then, you will see an outline of program you have chosen on the left side of the window. Click on the courses to see all information about that specific course: contact hours per week, in which quarter or semester the course is given, when you can take exams, and in some cases the course syllabus. You will also find the name and email of the module manager. If you have any questions about the course, send an email to the module manager.

You can't sign up for courses through the digital study guide. You can only find information about the courses. Enrolling for a course is done through Blackboard with your NetID after you have been admitted and enrolled in a program.
