

Global E3 Prospective Members Information

Thank you for your interest in the Global Engineering Education Exchange (Global E³). The application for the Global E³ program is a two-step process. First, the Global E3 Executive Committee will review your completed Prospective Member Application Form (appended on the next page). After this review (typically within 3 months), prospective members will be notified whether they can move forward and complete a full application. The full application will be reviewed by the Executive Committee for membership consideration. The entire process can take up to six months from Prospective Member Information Form submission to final selection. Please return this form and all supplementary materials electronically to the email address on the last page of the application.

The Criteria for Global E³ membership are:

1. Program quality (to include ABET accreditation or national/regional/professional equivalent) and international reputation.
2. Diversified undergraduate engineering curricula able to accommodate students from various areas of engineering.
3. A sufficient number of undergraduate engineering courses taught in English, ensuring incoming students of at least 4-5 relevant courses per semester in a range of engineering areas.
4. Availability of information in advance on the engineering courses (topics, level, syllabi and scheduling), especially those taught in English.
5. Demonstrated record of successful student exchanges, including a reference from a current bilateral partner.
6. The ability to accept students from a wide range of countries.
7. A 24/7 institutional emergency contact in case of a true emergency and information on the institution's Emergency Safety and Security Plan, available upon request. (Note: the phone number of the local police department will not suffice but campus police/security is acceptable.)
8. Availability of or assistance with housing for incoming students.

Desirable but not required:

1. Availability/assistance with internship placement.
2. Scholarships for international students.
3. Pre-semester course offerings in engineering, or short-course offerings at other times of year that could be included in the Global E³ program exchange.

Global E3 Prospective Members Information Form

Institution Name:

Website of Institution (main page):

Website of Faculty/School/College where engineering programs are housed:

Location of Institution (City, State/Province/Region, Country):

List of undergraduate (bachelors or equivalent) engineering programs and their relevant accrediting agency.

Total number of undergraduate degree-seeking students enrolled:

Approximate number of undergraduate engineering courses available in English each term:

Approximate number of non-engineering courses (e.g., social science, humanities) available in English for engineering students each term:

Is course information available on your webpage indicating the language of instruction, the course title, syllabi and/or topics, and the level? If so, list the web address:

Approximate number of engineering students studying abroad (outbound) on programs lasting more than 2 weeks each year:

Approximate number of engineering students studying at your institution (inbound) on programs lasting more than 2 weeks each year:

Do you have a 24/7 institutional contact available by phone in case of an emergency (not the local police department, but campus police/security is acceptable) Yes No
